ABOUT ME

I'm a web developer with a vast passion for coding and learning something new related to programming. Plus, I'm always highly motivated to contribute to companies and clients.

PROJECTS

● CountryBeen - Personal Project

A web application recording countries you've ever been to, coded Typescript and Redux-toolkit and styled with Tailwind CSS. Introducing the React library called 'React-Simple-Maps' to make countries users have been to visualize. Also, I manipulate data fetched from REST Countries API.

● FreshMarche - Personal Project

An e-commerce-like web application with basic CRUD operations such as 'add products to cart', and 'edit products in cart'. Also, this application has fundamental tools for e-commerce application as react-router, user-authentication powered by Firebase, and so on. Besides, this application introduces Stripe Checkout Form to showcase a dummy payment procedure.

● Doctor Appointment - Group Project

A useful web application for making appointments with doctors as well as checking out upcoming appointment schedules. Mainly this application is a JAMStack application connecting to Firebase as the database storing data for both users and doctors, in addition to the availabilities of doctors. At the same time, React is responsible for the front-end part styled by normal CSS, without any CSS framework or library.

WORK EXPERIENCE

● SMC Corporation

2017 - 2021 **Salesperson**

Worked as a salesperson selling mechanical parts and developed my soft skills that are compassion for clients, creative problem-solving for troubles, etc.

EDUCATION

● Cornerstone International Community

College of Canada

2021 - 2023

Web Development - Diploma degree

- Learned fundamentals of programming and experienced multiple team projects for gaining practical experiences.

● Shiga University

2012 - 2017 **Economics - Bachelor degree**
