KENTO HONDA

FRONT-END DEVELOPER

+1 (604) 671-3832 | kentos1112canada@gmail.com | **Portfolio website** | **LinkedIn** | GitHub

SUMMARY:

Front-end developer specializing in ReactJS with +1 year of equivalent experience including my current company and my projects. A quick learner with fast problem-solving skills and an insatiable passion for creating user-friendly, beautiful, and sophisticated applications. Through my experience and skills, I am confident that I could be a great asset and bring added value to your team.

SKILLS:

LANGUAGES: **Javascript(ES6)** | **Typescript** | HTML | CSS | Ruby
FRAMEWORKS & LIBRARIES: **ReactJS** | **Redux** | **NextJS** | React-Router | NodeJS | Express | Styled-Components | Material UI | Tailwind CSS | Chakra UI | Ant Design | Bootstrap | SASS/SCSS | jQuery | AJAX Ruby on Rails | bcrypt | JWT
SYSTEMS & DATABASE: MongoDB | Postgres | Firebase | REST API | GraphQL | Heroku | Git | Jest

WORK EXPERIENCE:

BuildN | FrontEnd Developer | 01 September, 2022 - Present | Vancouver, BC

Tech Stack: **NextJS** | **Typescript** | **Material UI** | **SASS/SCSS** | C# | ASP.net | AWS S3 | Azure
Summary: I've created reusable and efficient components and functions implementing API calls for BuildN's corporate web application. In addition, things I've gained at BuildN are:

• Managing and optimizing React States in the front-end part
• Collaborating with designers and BackEnd developers to decide specifications together
• Familiar with agile software development, including sprint meetings every two week
• Using Jira as a task management tool to work faster and more efficiently

PROJECTS:

ShoppingList-Mern-App | ReactJS, NodeJS, Express, MongoDB, ChakraUI, bcrypt, JWT

• MERN-stack application memorizing shopping items with a simplified but beautiful user interface
• Showcasing the skill in developing a full-stack application with strong knowledge of the backend side
• Using JWT and bcrypt as tools for implementing user authentication, and styling with Chakra UI.

StudyLog | Typescript, ReactJS, Firebase, Tailwind CSS, Ant Design Chart, MerakiUI

• Helpful web application that visualizes and analyzes users' daily study records easily
• Utilizing Ant Design Chart to visualize data coming from the database with beautiful line charts
• Manipulating data with firebase including users' study records and implementing user authentication

CountryBeen | Typescript, ReactJS, Redux, Firebase, TailwindCSS, DaisyUI

• Useful web application for remembering and counting countries where users have been before
• Applying Redux toolkit for state management with Typescript to optimize it effectively
• Taking advantage of react-simple-map (react library) to visualize world map with users' country data

FreshMarche | ReactJS, Firebase, MaterialUI, Stripe API

• E-commerce-like application specializing in fruits and vegetables
• Implementing CRUD operations as basic features of E-commerce with ReactJS and React-Router.
• Applying Stripe API for the checkout section implementing the dummy-checkout feature

Doctor Appointment | ReactJS, Redux, MongoDB, Firebase, Styled-components

• **Group project** - Practical application for booking doctor appointments
• Connecting React App to MongoDB, as well as utilizing firebase for user authentication.
• Utilized Trello as task management tool and followed agile development with daily scrum meetings

EDUCATION:

2021 - 2022 | Cornerstone International Community College of Canada

Web Development - Diploma | Learned fundamentals of programming and experienced multiple team projects for gaining practical experience.

2012 - 2017 | Shiga University

Bachelor of Science in Economics
